RazorGator Partners With Ping Identity for Secure Internet Sign In

Customers Gain Easy-to-Implement, Proven Secure Internet Single Sign-on (SSO) to RazorGator's TicketOS

Los Angeles, CA – Oct. 27, 2008 – RazorGator, a leading full-service secondary ticket and event experience company, announced today it has partnered with Ping Identity, the leader in secure Internet single sign-on (SISSO) software and services, to provide customers single sign-on access to their TicketOS corporate entertainment ticketing management systems.

“Because Ping Identity’s technology is easy to implement, and works seamlessly with existing identity management environments, we recommend PingFederate[®] to all customers who want single sign-on into TicketOS,” said John Wallace, TicketOS General Manager. “PingFederate allows our corporate customers to easily access their ticket management software application in a reliable and simple manner. And Ping Identity provides fantastic support.”

TicketOS delivers real-time visibility into a corporation’s ticket inventory in order to allocate, track and utilize tickets more efficiently and effectively and allows companies to maximize their investment in sports and entertainment sponsorships. In addition, the TicketOS ConciergeSM service allows corporations to buy tickets directly from RazorGator while still using the same TicketOS command and control features.

Secure Internet SSO simplifies access to TicketOS by enabling users to login once to their company’s network and use TicketOS and other external applications without additional logins. As a result, application use increases, IT support requirements associated with password resets are reduced and the potential for online identity and password theft is minimized, improving security. PingFederate can be deployed in only a few days and integrates with existing identity access management technologies.

“RazorGator’s TicketOS delivers a highly advanced solution for helping corporations transparently manage and account for their investments in sports and entertainment sponsorships,” said Mike Desai, Ping Identity Director of SaaS and BPO Business Development. “We are pleased that they have chosen to work with Ping Identity to ensure their customers are supported with an Internet SSO solution that matches TicketOS quality standards.”
