

TicketOS Case Study #1

Company Profile

1. Managing 75,000+ event tickets and parking passes through a centralized method.
2. Many tickets are reserved for VIP's within our company.
3. Excel spreadsheet or custom system is the tracking method.
4. Our internal Audit Department requires annual reports accounting for each ticket, who attended the event, and a business justification.
5. Purchases an estimated \$100,000 in sports and concert tickets for one off events.
6. Renewing season tickets is time consuming and often we don't know if we are getting the best deal possible.
7. As the ticket counts grow the shipping and fulfillment of the tickets is becoming difficult.
8. Many tickets go unused, and we feel this is a waste of money.
9. We don't have approvals in place today, so an employee can purchase any amount of tickets they wish.
10. Our employees call me when there is a problem with the ticket or parking pass.

Solution

Let our ticket experts receive, load, and store your tickets and parking passes.

TicketOS allows you to easily allocate tickets for an entire season to specific employees.

Manage all of your tickets in one easy to use web based system.

TicketOS has on demand reporting that allows you to produce dozens of reports to help you justify the cost of a ticketing program.

Aggregate your one off ticket purchases through TicketOS and receive discounts with the more you purchase.

Let the TicketOS team work with you to review and handle renewals with the venues and teams directly.

Let the TicketOS team ship and fulfill all of your ticket needs from our Los Angeles office. We ship more than a million tickets per year.

Reselling your tickets to consumers or to a corporate network exchange is an option.

TicketOS will allow you build approvals into the purchasing process so the employee's manager will authorize purchases.

Allow the TicketOS team to work with you to help solve ticketing problems.

Result

You can manage your inventory without ever having to touch a ticket again.

Employees will enjoy the same ticket allocation they have enjoyed in the past with a few key strokes. TicketOS will become your personal ticket management tool.

Reports that once took days to put together will now take minutes.

By aggregating your purchases you will save more money on hard to get sporting events.

Save money and time by leveraging our industry experts that work with each North American venue.

Enjoy managing your ticket program as our team loads, ships, and fulfills each one of your tickets.

Save money by reselling your tickets to other corporate partners.

Your CFO will never worry again whether ticket spending is being approved by a company manager prior to shipment.

Call our ticket experts when you're in a pinch and let them solve your problems.
